Questions & Answers

Questions & Answers

Input, what and how do you receive images before being processed, are there minimum requirements?

Output, how do you deliver your work?

To receive & deliver images, we use several popular services.

1. Dropbox
2. WeTransfer
3. FTP

If you want us to use your own FTP, Server or any other 3rd party file transfer system, we will use that as well.

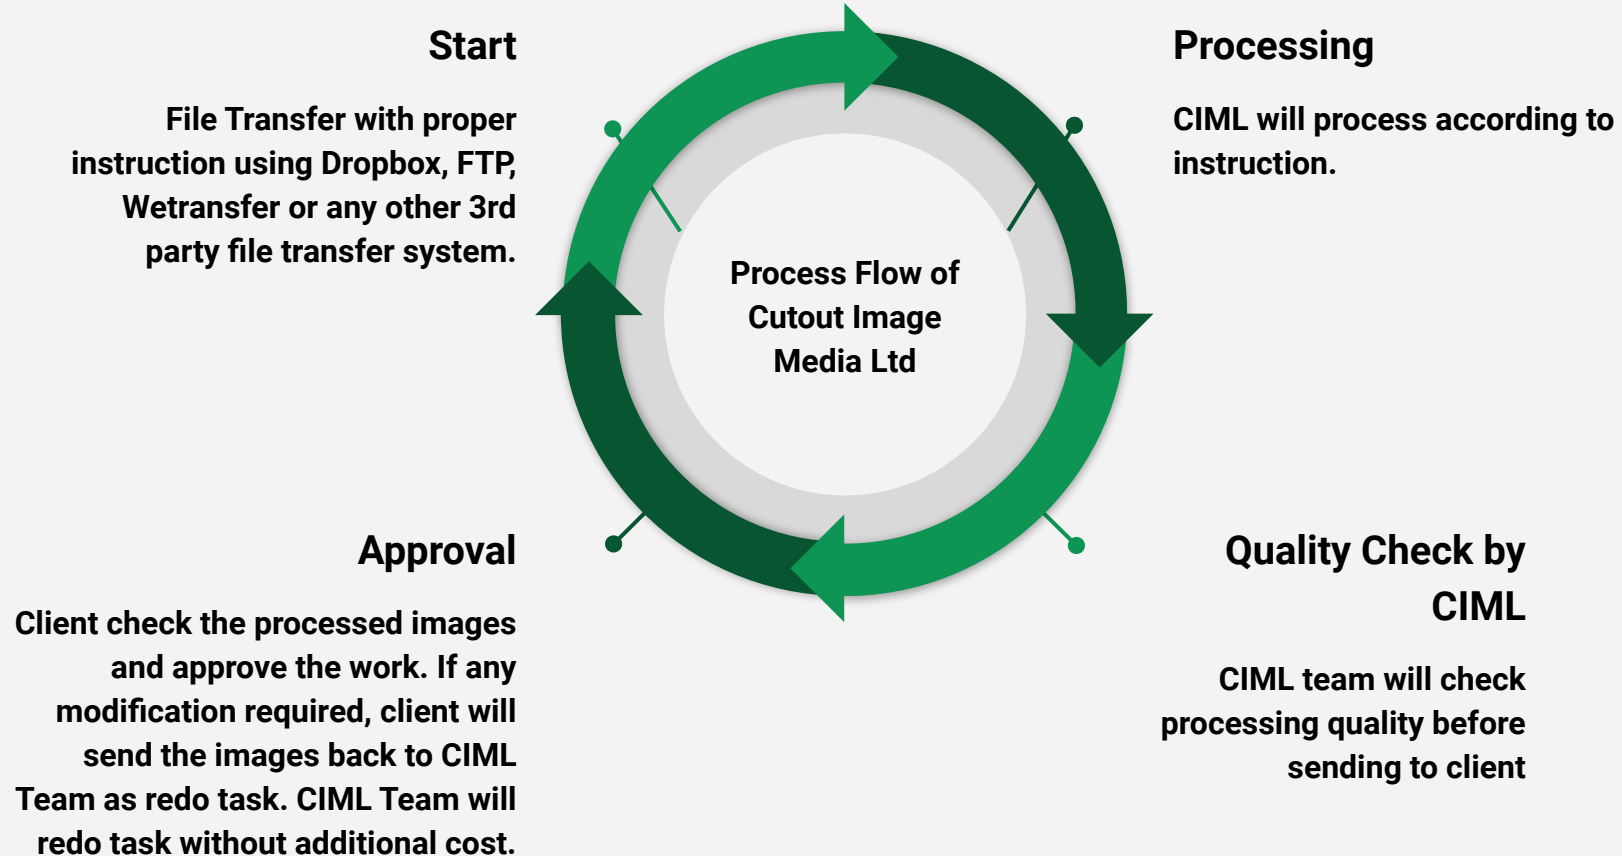

Minimum Requirements

Are there any minimum requirements?

No. There is no minimum requirements. But we prefer bulk order.

Process Flow

File Transfer - Automatic

We Prefer using dropbox. When a client agree to work with us we create a dedicated folder for that client. Each time client wants to share images with us, client will create a sub-folder under that folder, he/she will drop all images in that folder. We will get the files once uploading is completed from client end. We will check the instruction and files before start working.

Once our team finish processing the images, we create a folder under that subfolder “Done” and we will keep all the processed files within that folder. Once uploading is completed from our end, dropbox will start syncing folder & files in client end.

File Transfer - Manual

Client can send us files by using WeTransfer or FTP or any other 3rd party link. We will process the images and send back to client by using Dropbox / WeTransfer.

FTP can be done automated. At the moment, we are not using any customized software for files transfer. Currently, we rely on Dropbox & WeTransfer. We have premium subscription on both platforms.

SLA's Performance Speed

Our current production capacity 7000 images per day with 200+ employee. We are able to process 20% more when we have more images then regular.

- TAT - Turnaround time for 7000 images is 24 hours. (Depends on the complexity of images)
- 24/7 Production Services, 8 hours service per shift, total 3 shifts
- We will process your images according to your given deadline.
- High configured computer for smooth workflow
- High speed corporate internet connectivity
- 24/7 Electricity backup

Validation Process

Our Process

1. Download at Local Server
2. Files will be shared with Team Leader
3. Team leader will distribute to designers
4. Designer will process and send it to QC Team
5. QC Team will review each files (1st Check)
6. QC Manager will review each files according to instruction (2nd Check)
7. QC Manager will deliver files to Client
8. Client will review and approve the work
9. If any modification requires, client will send back the images to us. We will process them without additional cost.

Automated Validation Process

Not applicable. We validate all of our images manually. It gives us better result and satisfy our clients.

Free Trial

We offer free trial to all of our new client.

We request you send images and instruction to process your trial.

We offer image processing services for 7 main category. You can get trial 2 images from each category. Total 14 images will be process free of cost for new clients only.
